

Modern Convent School

Dwarka, New Delhi, India

A multi playing surface (sand-filled) for football, cricket, tennis, basketball and a 200m running track.

Date of Project Completion: September 2014

Surface/s: Tournament 1000 for multi sports and Premier for cricket

Base Construction: Dynamic with sub-soil drainage

The school had a decaying, natural grass field which was not suited to handle the rigours of hundreds of students using it hour after hour, day after day. The severe paucity of water in the area added to the woes of the management for maintaining the field.

This is where the passion and expertise of TigerTurf-Altius came into "play". A multi-surface that could withstand unlimited hours of use was zeroed upon, along with the design and build of a dynamic, porous base with sub-soil drainage system.

The product used is Tournament 1000 which is part of the TigerTurf Education Range and provides students an opportunity to be more active, healthy and engaged in sport. Spread across 60,000 square feet, this installation bears testimony to the fact that our Tournament1000 surface is not only the most popular surface for schools in Australasia but in India as well!

A truly versatile surface that is maintenance-free, UV stabilized and has years and years of play.
