

Smt. Sulochanadevi Singhania School

Thane, Maharashtra, India

Complete design and installation of 5-layer acrylic court for tennis and basketball

Date of Project completion: September 2018

Surface/s: ITF approved 5-layer synthetic acrylic surface

Base Construction: Asphalt

The management at Smt. Sulochanadevi Singhania School aims to embrace modern technology to ensure that “citizens of tomorrow” are able to achieve greater heights of progress and development both in academics and sports. Trusting the workmanship and professionalism at Altius Sports, the management of the school entrusted Altius to build, install and deliver their “love of the sport”.

The ITF approved acrylic surface is manufactured from premium quality 100% acrylic resins, is an all-weather surface with excellent abrasion resistance and uniform texture. It is skid and water resistant and, at the same time, has confident player footing that immensely helps train athletes at all levels. The facility has a good value for the investment made and is excellent for playing sports such as basketball and tennis.

Economical and available in wide range of colours, the play areas now have transformed into an aesthetically attractive “arena”, providing the students an opportunity to be more actively engaged in the field of sports.

Inaugurated in the presence of former Indian tennis player, Somdev Devvarman, this facility will also be used by the community youth for training post school hours. “Today sports can also be a profession and therefore I would encourage the students to make use of all these facilities offered by Singhania School.” said the Principal, Revathi Srinivasan at the inauguration.
