

TPW residential landscape project

Kolkata, WB

Supply and installation of TigerTurf Landscape turf

Date of project completion: December, 2023

Surface: TigerTurf Harmony Lite 30 & TigerTurf Sine pad

Base construction: Concrete

A terrace that is green, serene and forever pleasing can only be made possible by TigerTurf landscape turf. And with the additional usage of our Sine Pad, this leads to cushioning as well as faster drainage and the result is simply "wow."

Like always, this project once again provided us the opportunity to showcase our proficiency and ingenuity in the landscape turf domain as well. The entire design was done by our in-house team with two separate zones being covered in "green" and the team ensured that the installation was such that the rooftop garden looks lush and manicured, whatever the season.

TigerTurf Harmony Lite 30 is a two-tone thatched yarn and distinctly gives a realistic impression of recently mowed grass. Our TenCate yarns conform to the best in European and US standards and are also EN71-3* certified, implying that they cause no risk to young and old, children or pets.

TigerTurf

The UV stabilisation on the yarn ensures no colour fading for years and years the entire turf is heavy metal free and contains no harmful chemicals and is safe even for pregnant women.

With the turf we have also installed TigerTurf Sine Pad. It is an exceptional product used as both a shock pad and for drainage. It provides a comfortable, cushioning surface making it easier on joints and muscles. The Sine shock pad also helps reduce wear on the back of the tufts of the carpet that would otherwise be in contact with base material. This spreads the weight and impact of users across a wider area of the turf and this decreases the wear and increases longevity of the turf.

When you think green, think TigerTurf landscape grass.
