

Venkateshwar International School

New Delhi, India

Educational Play Area

Full design, manufacture and installation of children's play area.

Date of Project Completion: September 2014

Surface: TigerPlay

Base Construction: Plain Cement Concrete

The existing play area for the elementary kids of the school was of mud and grass and not conducive for play most of the year round, especially during the monsoons. Further, maintaining grass was a difficult task for the school and the play area remained out of bounds most of the time.

Altius came up with a solution that was both "colourful and green". A dense, soft-cushioned yet hard-wearing surface, in a burst of colours and a marginal amount of in-fill - TigerPlay is the most preferred synthetic turf surface in kindergartens the world over.

Creatively conceived and beautifully installed, the facility calls for minimum maintenance and has elevated the playground to a new level. The surface is now a burst of colours, natural to feel and requires no watering or mowing and is playable all-year-round.

"Altius has provided the school with a complete solution with this safe and hygienic recreational play area for the kids. The facility has brought immense happiness and satisfaction to all associated with it," says Kamal Solanki, Chairman, VIS, New Delhi.
